Does Your Volunteer Screening
Program Make the Grade?
Take the quiz and find out!

A+

Background screening volunteers is an important part of your safety program, but it's critical for districts to understand that not all screens are the same. Because you are responsible for protecting vulnerable populations, performing the highest quality screen on volunteers is vital.

To help you assess your current program, we have created a short quiz that will grade your current program, advise you of possible gaps in your screening and provide you best practices to help reduce risk and enhance the safety of your program.
