1ST REVEAL

FULL INTERIOR

Our wood windows do not require cladding. This makes them ideal for historically correct windows, which should have a wooden frame and trim. With most any other wood window, this would be impossible to expose the wood to the elements but not for our windows made with AuraLast® pine. The combination of AuraLast and the pre-casing make our wood windows the best choice for the northeast.

The JELD-WEN Wood Window Difference

What sets the JELD-WEN wood window apart from the rest? Our materials, options and more!

AuraLast pine

- Treated to the core wood product
- Protection from wood rot, water saturation and termites
- Limited lifetime warranty
- If not cladding the exterior, paint the AuraLast trim any color

Pre-Casing

- System includes trim and sill attached
- Complete window system is integral part of the look
- Time savings at installation
- Reduction in labor needed for install
- Milled pieces can also be part of the pre-casing
- Sill horns can be extended past casing
- Thin wood frames mimic historic details
- AuraLast pine so no worries about exposure to the elements

Cladding

- Windows don't require cladding but can be added
- Factory finish in a variety for colors that resists facing or chipping
- Ideal for use with complex grilles
- Low maintenance

Other benefits

- Simulated divided lites (SDLs) provide a historic look while also being more energy efficient than true divided lites
- ENERGY STAR® qualified
- Multiple interior color customization options

Whether you want to frame a view or let light into a space, JELD-WEN wood windows offer you a world of possibilities. To learn more about our wood window options, visit your local dealer.

The northeast requires specific design elements for an **authentic wood window**. Whether you're trying to simulate a design from the 1750s or 1930s, we have a wood window for you. There's no limitation to design with our windows. And you'll enjoy how they hold up in the elements as well.

Traditional Wood Window Look, Modern Wood Window Function

AUTHENTIC WOOD WINDOWS
WITH MODERN PERFORMANCE

Our wood windows do not require cladding. This makes them ideal for historically correct windows, which should have a wooden frame and trim. With most any other wood window, this would be impossible to expose the wood to the elements but not for our windows made with AuraLast® pine. The combination of AuraLast and the pre-casing make our wood windows the best choice for the northeast.
